Education

NATIONAL UNIVERSITY - LAGUNA

Information Technology

School of Computer Studies, IT
2021

WorkQuest: A Real-time Work Request And Equipment Management Coordination System for TANN PHILIPPINES, Inc.

Experience

PhilHarvest

Fullstack Developer

April - May 2026

- Developed backend features to process and manage Electronic Data Interchange (EDI) transactions using PHP, MySQL, and Render services; Tested and debugged backend APIs using Thunder Client to ensure reliable data processing and system functionality.
- Enhanced frontend components by implementing additional features and improving the overall user experience.

C4GG

UX Designer & Frontend Developer

Nov 2025 – Jan 2026

- Helped with UI/UX design for a civic-focused web platform to help empower citizens in reporting issues using Figma.
- Designed a visual system, including 4 page layouts and reusable components using Figma based on the existing branding.

Stardew Crops Calculator

- Developed an interactive crop profit calculator inspired by Stardew Valley, allowing users to input crop and farming parameters (seed cost, farmer level, fertilizer, and processing options) and visualize results through dynamic bar graphs.

Leadership and Activities

School of Computer Studies - Student Council (SCS-SC)

NU-L

Creative Director

Aug 2018 – May 2020

- Led a visual identity refresh by redesigning the organization's logo and developing a cohesive brand kit, officer uniforms, and official pins in adherence to school design standards; adopted by 31 council officers.
- Designed intramural sports uniforms worn by 50+ athletes across 8+ sports categories during the school's 3-day sports festival.
- Streamlined the submission and organization of editable Canva files into a centralized repository containing 35+ assets, improving design reuse and handoff efficiency using Google Forms and Notion.

Certifications

- IT Specialist - Network Security (Certiport) May 2026
- IT Specialist - Databases (Certiport) Mar 2025

Skills & Interests
